

## Inventory Assessment Services

*Trew's team can assist with inventory assessments to improve accuracy and stocking levels*

Maintaining the correct inventory is critical for keeping systems running smoothly and avoiding downtime. Trew's experienced team will work to understand your current inventory management, gather data, conduct analyses, and provide a report with findings and recommendations. The inventory assessment services offered are the Onsite Inventory Audit and Inventory Evaluation and they provide a thorough analysis to optimize stock levels, reduce costs, improve efficiency, and more.

**Inventory Analysis** – This remote service includes a review of the customers inventory list, recommended spare parts list, and parts usage report. Trew's Parts team will review these items and make recommendations on what parts they should have on-hand based on usage and criticality.

**Onsite Inventory Audit** – This onsite service includes a full onsite MHE inventory audit. Trew's Field Service Team will count the customers' inventory and provide the information for their records. Our team will make recommendations for operations, parts storage, parts quotes, and inventory levels.

### Features & Benefits

- Inventory Assessment – tailored report includes stock levels and demand forecasting based on the customer's data or an in-person inventory analysis conducted by Trew's field service team
- Trew's team will identify excess inventory, obsolete stock, and provide cost saving measures
- Suggestions for streamlining inventory processes and improving accuracy
- Organization – Recommendations for operations, parts storage, and inventory levels
- Part stock recommendations and quotes
- Ensures customers are well-stocked with essential parts to avoid operational disruption
- Allow customers to prepare for peak season and scheduled maintenance
- An online self-serve parts store, Trewstore.com, to allow you to order parts 24x7
- Customer Satisfaction – Our Main Priority, yours, and your customer
