

## Sorter Rebuilds

*Whether your sorter has seen years of heavy use and is due for significant maintenance or its near obsolescence, Trew helps assess maintenance or rebuild needs by identifying, sourcing, and installing components to restore performance and reliability.*

Trew understands that the sorter is the heartbeat of your operations. Minimizing downtime is critical to executing a successful rebuild and to keep operations running smoothly long after completion. Our expert team works alongside your team every step of the way through rebuilds, replenishing parts, and maintenance planning to keep your sorter performing at its best.

### Trew provides:

- Sorter Assessment – detailed assessment of sorter to determine rebuild scope
- Extends sorter life – focused rebuild approach to improve longevity while avoiding disruption of a full sorter replacement
- Customized parts recommendations and preventative maintenance suggestions to support long term uptime.
- Customized parts recommendations and preventative maintenance suggestions to support long term uptime.
- Customer Satisfaction – Transparent communication, expert recommendations and customer first mindset.
- We have experience with Buschman®, FKI Logistex™, Intelligrated®, Dematic® and Daifuku® sorters (tube, slat or sliding shoe). Curious if we can help – just ask.

### About TREW

Trew® is a trusted U.S.-based manufacturer and integrator of automated material handling solutions and the software that powers them. We serve the retail, e-commerce, distribution, and parcel industries with sortation, conveyors, robotics, AS/RS, and lifecycle services to help clients' operations run smarter, adapt faster, and achieve the highest lifetime value.
