

# Computerized Maintenance Management System (CMMS)

*Entrust Trew's CMMS to manage preventative care and focus on your maintenance operations*

CMMS is software designed to help companies manage maintenance operations, assets, inventory, and additional information. Essential data is stored and organized to allow you to manage your systems smoothly. CMMS allows your technicians to focus on their responsibilities and ensure tasks are effectively managed.

Trew offers the expertise to aid in setting up your CMMS with material handling equipment and more. To ensure a smooth start-up, Trew asset data and hierarchies, preventative maintenance schedules, and parts provided by Trew are preloaded into the CMMS. We provide initial training sessions and provide ongoing application support. The CMMS is configured for your system to meet specific facility requirements.

## Features & Benefits:

- CMMS provides structure for work orders, parts inventory management and valuable reporting such as price / asset for planning purposes
- Pre-loaded work order schedules
  - Includes preventative maintenance schedules and routine checks
  - Organized by assets and hierarchy
  - Parts provided by Trew are preloaded into the system for easy tracking and use
- CMMS licenses for your technicians
- SME for CMMS and Trew conveyor to assist with on-going needs:
  - Initial training session outlining how to use CMMS in facilities
  - Ongoing application support such as adding new assets, creating new reports, changing PM schedules, etc.
  - Training refreshers

## **About TREW**

TREW provides automated material handling solutions for integrators and end users, including Warehouse Execution Systems (WES), Warehouse Control Systems (WCS), PLC- and server-based machine controls, motorized driven roller (MDR) conveyor and services such as concepting, engineering, technical support, parts, field service and training. Serving the North American retail, warehouse, distribution, manufacturing, and ecommerce industries, TREW's experienced staff and broad network of integrator partners enable uncommonly smart solutions scalable to any material handling needs.
