

Modifications & Upgrades

Increase your return on material handling investment with a hardware, software or controls modification or upgrade

Over time, distribution, manufacturing and fulfillment operations inevitably change. Whether changes are driven from adjustments in business strategy, the embrace of newer technologies or additions to account for growth, Trew® can help with modifications and upgrades to help your facility remain efficient and add to your overall ROI.

Trew provides:

- Recontrols for systems to avoid obsolescence or wanting to convert to PLC-based controls
- Technology refreshes to update computer hardware, software, operating systems, PLCs, VFDs, servo-drives and/or HMIs
- Conveyor, pick module, pick and pass, and other changes and additions for distribution and ecommerce operations
- Electrical upgrades for greater energy efficiency
- Sub-system additions and modifications for PANDA, ARB sorters, routing modifications, WMS interfaces, HMIs, arc flash panel protection
- Mechanical refurbishments to bring material handling equipment back to original OEM specifications
