NEWS RELEASE

Trew Appoints Cortney Hunt as Chief Operating Officer, Adding End User Executive Experience to Leadership Team

Strategic Appointment of Operations Veteran to Lead "Winning Together" Implementation Strategies.

(West Chester, Ohio) – [Trew, LLC](#), a leading provider of intelligent warehouse automation solutions, has appointed Cortney Hunt as Chief Operating Officer. Hunt brings over 25 years of leadership in the strategy, selection, and implementation of warehouse technologies as an end user. In his role with Trew, he will oversee product development, manufacturing, and project delivery operations, ensuring flawless delivery of the company's innovative automation solutions to customers.

Prior to joining Trew, Hunt served in senior leadership roles during his tenure at McLane Company Inc., most recently as Vice President of DC Network and Facilities. Throughout his career, he has consistently enhanced operational efficiency through the strategic implementation of automation and transportation technologies while building high-performing technical teams to support complex distribution center operations.

"Adding Cortney to our leadership team brings a genuine customer perspective to our solutions and implementation, helping us deliver a better product" said Trew CEO, Alfred Rebello. "Cortney will add vast end user experiences to our team and lead driving operational improvements, streamlining processes, improving products, and helping ensure efficiency and alignment across the organization.

"I am excited to join Trew and further strengthen our position as a trusted partner, delivering innovative automation solutions with the highest life-time value to our customers," said Trew's new COO, Cortney Hunt. "I am very grateful for my time at McLane Company Inc., where I gained invaluable experience. Trew has an exceptionally talented team, and I look forward to helping them and our clients thrive."

Hunt holds both bachelor's and master's degrees in engineering from the University of Oklahoma. He is a certified Lean Six Sigma Black Belt and former member of the University of Mary Hardin-Baylor College of Business Advisory Board.

About Trew

Trew provides automated material handling solutions for integrators and end users, including Warehouse Execution Systems (WES), Warehouse Control Systems (WCS), PLC-based machine controls, sortation technology, motorized driven roller (MDR) and conventional conveyor systems, and services such as concepting, engineering, technical support, parts, field service, and training. Serving the North American retail, warehouse, distribution, manufacturing, and e-commerce industries, Trew's experienced staff and broad network of integrator partners enable uncommonly smart solutions scalable to any material handling needs.
