

Narrow Belt Conveyor

Live Roller Transportation Unit

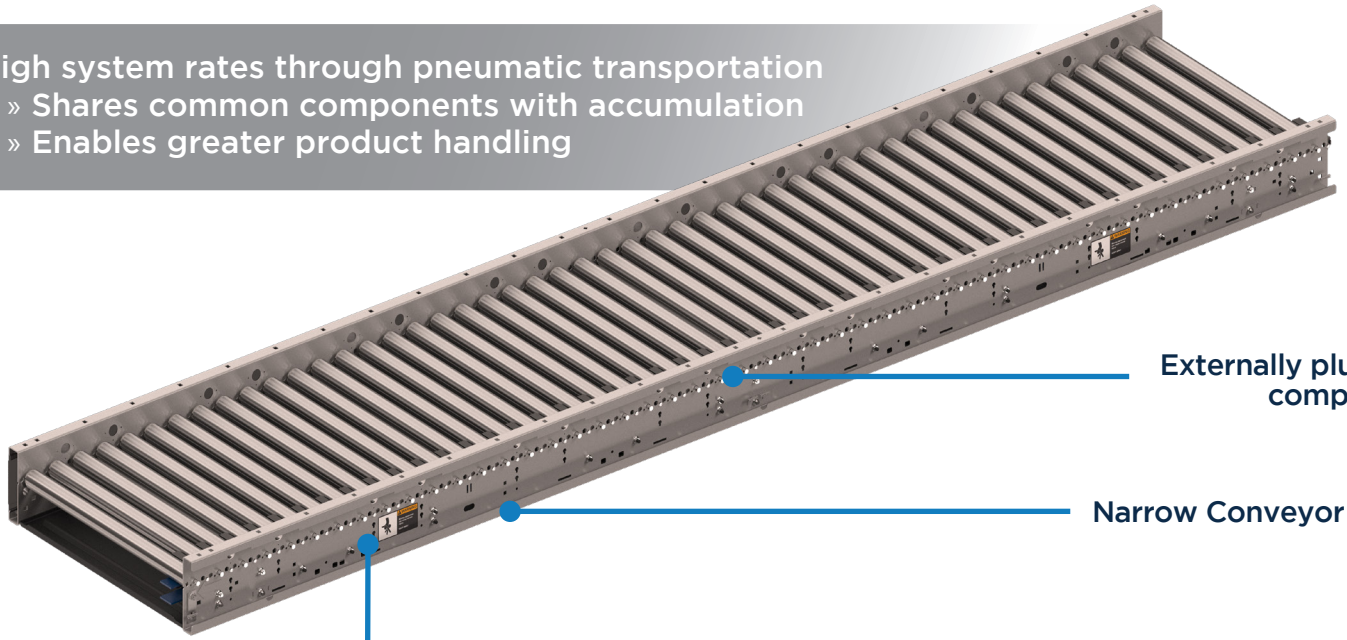

Pneumatically Actuated

POWERED BY

TREW®

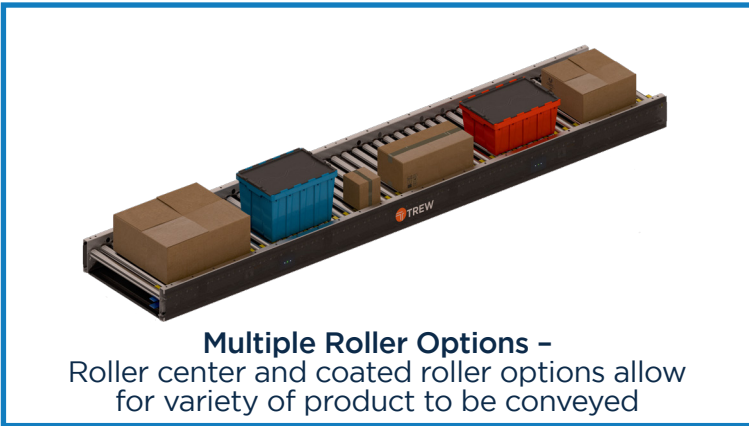

Trew's Narrow Belt Transportation conveyor allows for a cost effective solution when accumulation is not required. Because the NBT utilizes similar components from the Accumulator, upgrading your transportation unit is seamless. This conveyor line ensures maximized system uptime by taking advantage of industry leading belt retention capabilities.

- High system rates through pneumatic transportation
 - » Shares common components with accumulation
 - » Enables greater product handling

Externally plumbed components

Narrow Conveyor Profile

Multiple Roller Options -

Roller center and coated roller options allow for variety of product to be conveyed

Push-in Pneumatic Fitting -

Easy release function of tubing allows for fast replacement

KEY FEATURES AND BENEFITS

- Maximum unit length: 300'
- Gentle carton handling, eliminates side-by-sides
- Wide mix of product handling:
Totes, cartons, boxes and more

- Easy Installation and Maintenance
Finger guards, durable injection-molded pulleys and universal components
